LE BLANC GENERAL DENTISTRY & AESTHETICS OFFERS A  
PERSONALIZED APPROACH TO GENERAL AND COSMETIC  
DENTISTRY AND AESTHETICS

Katya Kulic's vision for her dental practice has always been to create an inviting atmosphere, eliminating any fear or discomfort around visiting the dentist. Her vision became a reality with Le Blanc General Dentistry & Aesthetics.

Dr. Katya Kulic and her team specialize in general and cosmetic dentistry as well as facial aesthetics. Their in-house specialists eliminate the need for referrals and improve patient care. She prides herself on educating her patients about dental health and the natural anti-aging treatments available.

*“This is a very exciting  
time in dentistry;  
with new technology,  
we enhance our  
client’s confidence.”*  
– Dr. Katya Kulic

From laser teeth whitening to digital AI x-rays to digital full-mouth scans, Dr. Kulic incorporates technology into her practice to better serve the needs of her patients. “This is a very exciting time in dentistry; with new technology, we enhance our client’s confidence by improving smiles as well as the entire face non-surgically and non-invasively.” Dr. Kulic says.

These innovative, non-invasive treatments require very little to no downtime:

**EMFACE** harnesses the combination of Synchronized radiofrequency (RF) and High-Intensity Facial Electromagnetic Stimulation (HIFES™). This tightens facial muscles and enhances the collagen production in the skin for a firmer, more youthful appearance.

**EXION** combines the transformative powers of fractional radiofrequency (RF) and microneedling. It uses AI technology to deliver a precise amount of fractional RF into the deeper layers of the skin promoting the growth of healthy skin cells and enhanced collagen formation.

**Sofwave™ Medical** takes a novel approach to skin tightening, using the fractional heating effect via unique ultrasound delivery. This process stimulates the production of new collagen and elastin, reducing fine lines and wrinkles.

“If our smile is the focal point of our face, once we achieve a healthy, beautiful smile, it’s optimal to lift and tighten the rest of the canvas.” Dr. Kulic loves her clients and is passionate about what she does.

Taking the time to get to know her clients allows Dr. Kulic to work with her patients to effectively reach their goals strategically and conservatively. “Thankfully, with our cutting-edge technology, we can turn back the aging clock and give our patients a more youthful version of themselves,” Dr. Kulic says.
